

## Africa 2019 International Pavilion Booking Form

The PESGB / HGS Africa E&P Conference 2019 is the primary technical E&P conference and exhibition on Africa in the UK. Complementing the outstanding technical conference, the exhibition space will once again feature industry operators, service companies, national oil companies and professional organisations.

The designated space for those international representatives is a forum to increase their exposure and promote licensing rounds and/or available acreage to over 600 key industry professionals, all specifically working or interested in the Africa region. Reflecting the high-quality technical content, 50% of the audience is G&G, with 20% of the audience identifying themselves as C-level executives.

What better way to reach out to the European market than exhibit at Africa E&P Conference 2019? This year to accommodate the increased interest in the show, we have decided to move to the Conference Centre in Olympia London, which means a new, exciting venue with multiple networking opportunities as part of the conference programme and a new floorplan, specifically designed to maximise footfall around the booths.
